1.Created a class Student.

2.Initialised the data members using Constructor.

3.Overrided the Constructor.

4.Created a Demo class which consists of Main().

5.Defined Arraylist and all the elements and printed it using Iterator.

6.Defined HashSet and added Arraylist to the set.

4.Cleared the Arraylist and now added the HashSet to Arraylist.

5.Again Using Iterator printed all the elements of the Arraylist.

6.Output is coming as expected.

Screenshot:

```
C:\Users\IBM_ADMIN\javaprg>javac Demo.java
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true

C:\Users\IBM_ADMIN\javaprg>java Demo
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true
